Subject Index

Volume 31, January–June 1998

A

Acetylcholine
Endothelial Dysfunction in Hypertension Is Independent From the Etiology and From Vascular Structure, 335
Role of Nitric Oxide in Adenosine-Induced Vasodilation in Humans, 1061
Role of Tyrosine Kinase in Dilator Responses of Rat Basilar Artery In Vivo, 861

α-Adducin
Lack of Association Between the α-Adducin Locus and Essential Hypertension in the Japanese Population, 730

Adenosine
Adenosine Inhibits Collagen and Protein Synthesis in Cardiac Fibroblasts: Role of A_{2B} Receptors, 943
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Cyclic AMP-Adenosine Pathway Induces Nitric Oxide Synthesis in Aortic Smooth Muscle Cells, 296
Role of Nitric Oxide in Adenosine-Induced Vasodilation in Humans, 1061

A_2 Adenosine receptors
Cyclic AMP-Adenosine Pathway Induces Nitric Oxide Synthesis in Aortic Smooth Muscle Cells, 296

Adenovirus
Kallikrein Gene Delivery Attenuates Hypertension and Cardiac Hypertrophy and Enhances Renal Function in Goldblatt Hypertensive Rats, 1104

Adenyl cyclase
Vascular β-Adrenergic Receptor Adenylyl Cyclase System From Renin-Transgenic Hypertensive Rats, 1157

Adolescents
Longitudinal Correlates of Change in Blood Pressure in Adolescent Girls, 97

Adrenal cortex hormones
Increased Glucocorticoid Activity in Men With Cardiovascular Risk Factors, 891

Adrenal medulla
Role of the Adrenal Medullae in Male and Female DOCA-Salt Hypertensive Rats, 403

Adrenergic antagonists
Endothelin-1 Regulates Tone of Isolated Small Arteries in the Rat: Effect of Hyperendothelinemia, 1035

Adrenomedullin
Adrenomedullin: A Possible Autocrine or Paracrine Inhibitor of Hypertrophy of Cardiomyocytes, 505

Afferent renal nerve activity
Renal Substance P–Containing Neurons and Substance P Receptors Impaired in Hypertension, 815

Africa
Knowledge, Attitudes, and Practices on Hypertension in a Country in Epidemiological Transition, 1136

African Americans
Identification of Human Plasma Kallikrein Gene Polymorphisms and Evaluation of Their Role in End-Stage Renal Disease, 906

Africans
Insulin Resistance and Hypertension in Non-obese Africans in Tanzania, 114

Age
Interaction Between Body Size and Cardiac Workload: Influence on Left Ventricular Mass During Body Growth and Adulthood, 1077
Three Important Subgroups of Hypertensive Persons at Greater Risk of Intracerebral Hemorrhage, 1223

Aging
Cardiac Mitogen-Activated Protein Kinase Activities Are Chronically Increased in Stroke-Prone Hypertensive Rats, 50
Spontaneously Hypertensive Rats: A Potential Model to Identify Drugs for Treatment of Learning Disorders, 968

AHA News
Working Group Report on Science-Based Categories for Abstracts Submitted to the Annual Scientific Sessions, 1042

Albuminuria
Prevention of the Cardiovascular and Renal Effects of Angiotensin II by Endothelin Blockade, 10

Aminopeptidase
Angiotensinases Restrict Locally Generated Angiotensin II to the Blood Vessel Wall, 368

Amlodipine
Amlodipine Monotherapy, Angiotensin-Converting Enzyme Inhibition, and Combination Therapy With Pacing-Induced Heart Failure, 755
Efficient Inhibition of the Development of Cardiac Remodeling by a Long-Acting Calcium Antagonist Amlodipine, 32

Androgens
Testosterone Exacerbates Hypertension and Reduces Pressure-Natriuresis in Male Spontaneously Hypertensive Rats, 435

Angioplasty, balloon
Blood Pressure Outcome of Angioplasty in Atherosclerotic Renal Artery Stenosis: A Randomized Trial, 823

Angiotensin
Angiotensinases Restrict Locally Generated Angiotensin II to the Blood Vessel Wall, 368
Gender Affects Renal Vasoconstrictor Response to Ang I and Ang II, 90
Human Vascular Renin-Angiotensin System and Its Functional Changes in Relation to Different Sodium Intakes, 836
Influence of Nitric Oxide in the Chronic Phase of Two-Kidney, One Clip Renovascular Hypertension, 649
Maintenance of Baseline Angiotensin II Potentiates Insulin Hypertension in Rats, 637

Angiotensin-(1–5)
Metabolism of Angiotensin-(1–7) by Angiotensin-Converting Enzyme, 362

Angiotensin-(1–7)
Angiotensin-(1–7) Contributes to the Antihypertensive Effects of Blockade of the Renin-Angiotensin System, 356
Metabolism of Angiotensin-(1–7) by Angiotensin-Converting Enzyme, 362
Vasodepressor Actions of Angiotensin-(1–7) Unmasked During Combined Treatment With Lisinopril and Losartan, 699

Angiotensin-converting enzyme
Acute ACE Inhibition Causes Plasma Extravasation in Mice That is Mediated by Bradykinin and Substance P, 1299
Angiotensin-(1–7) Contributes to the Antihypertensive Effects of Blockade of the Renin-Angiotensin System, 356
Angiotensin-Converting Enzyme Gene Polymorphism Is Associated With Endothelium-Dependent Vasodilation in Never Treated Hypertensive Patients, 900
Gender Affects Renal Vasoconstrictor Response to Ang I and Ang II, 90
Metabolism of Angiotensin-(1–7) by Angiotensin-Converting Enzyme, 362
Persistent Reduction in Renal Nerve Growth Factor mRNA After Perindopril Treatment of Young Spontaneously Hypertensive Rats, 678
Role of Ca^{2+}-Activated K^+ Channels in the Protective Effect of ACE Inhibition Against Ischemic Myocardial Injury, 1290
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925

Angiotensin-converting enzyme inhibition
Amlodipine Monotherapy, Angiotensin-Converting Enzyme Inhibition, and Combination Therapy With Pacing-Induced Heart Failure, 755

Angiotensin-converting enzyme inhibitors
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39

Enalapril Induces Regression of Cardiac Hypertrophy and Normalization of pH_i Regulatory Mechanisms, 961
Influence of Race and Dietary Salt on the Antihypertensive Efficacy of an Angiotensin-Converting Enzyme Inhibitor or a Calcium Channel Antagonist in Salt-Sensitive Hypertensives, 1088
Perindopril Treatment Affects Both Preglomerular Renal Vascular Lumen Dimensions and In Vivo Responsiveness to Vasoconstrictors in Spontaneously Hypertensive Rats, 1007
Relationship Between Endothelial Function and Fibrinolysis in Early Hypertension, 321
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925
Treatment With Enalapril Modifies the Pain Perception Pattern in Hypertensive Patients, 1146

Angiotensin II
Abnormal Regulation of Transforming Growth Factor-β Receptors on Vascular Smooth Muscle Cells From Spontaneously Hypertensive Rats by Angiotensin II, 672
Angiotensin AT_{1B} Receptor Mediates Calcium Signaling in Vascular Smooth Muscle Cells of AT_{1A} Receptor–Deficient Mice, 1171
Angiotensin II Induces Vascular Smooth Muscle Cell Replication Independent of Blood Pressure, 1331
AT_2 Receptor Stimulation Increases Aortic Cyclic GMP in SHRSP by a Kinin-Dependent Mechanism, 349
Augmentation of Aortic Ring Contractions by Angiotensin II Antisense Peptide, 854
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39
Chronic AT_1 Receptor Blockade Alters Aortic Nerve Activity in Hypertension, 973
Efficacy and Tolerability of Losartan in Hypertensive Patients With Renal Impairment, 684
Growth Factors and Mitogen-Activated Protein Kinases, 152
Increased Cardiac Angiotensin II Receptors in Angiotensinogen-Deficient Mice, 45
Integrins, Adhesion, and Cardiac Remodeling, 176
Interactions of Transforming Growth Factor-β and Angiotensin II in Renal Fibrosis, 181
Interactive Nitric Oxide–Angiotensin II Influences on Renal Microcirculation in Angiotensin II–Induced Hypertension, 1255
Intravenous Injection With Antisense Oligodeoxynucleotides Against Angiotensinogen Decreases Blood Pressure in Spontaneously Hypertensive Rats, 1166
Localization and Production of Angiotensin II in the Isolated Perfused Rat Heart, 1111
Losartan but Not Verapamil Inhibits Angiotensin II–Induced Tissue Endothelin-1 Increase: Role of Blood Pressure and Endothelial Function, 1305
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978
Prevention of the Cardiovascular and Renal Effects of Angiotensin II by Endothelin Blockade, 10
Prostaglandin E_2–Induced Aldosterone Release Is Mediated by an EP_2 Receptor, 575
Prostaglandin I_2 Contributes to the Vasodepressor Effect of Baicalein in Hypertensive Rats, 866
Protective Effect of Angiotensin II-Induced Increase in Nitric Oxide in the Renal Medullary Circulation, 271
Reduction of Cold-Induced Hypertension by Antisense Oligodeoxynucleotides to Angiotensinogen mRNA and AT_1-Receptor mRNA in Brain and Blood, 1317
Renal Nerves Promote Sodium Excretion in Angiotensin-Induced Hypertension, 429
Role of Eicosanoids in Angiotensin-Dependent Hypertension, 194
Role of Mitogen-Activated Protein Kinase in the Angiotensin II–Induced DNA Synthesis in Vascular Smooth Muscle Cells, 1151
Role of Phospholipase A_2 Isozymes in Agonist-Mediated Signaling in Proximal Tubular Epithelium, 809
Salt Induces Vascular AT_1 Receptor Overexpression In Vitro and In Vivo, 1272

Angiotensin peptides
Vasodepressor Actions of Angiotensin-(1–7) Unmasked During Combined Treatment With Lisinopril and Losartan, 699

Angiotensinase
Angiotensinases Restrict Locally Generated Angiotensin II to the Blood Vessel Wall, 368

Angiotensinogen
Blood Pressure–Independent Cardiac Hypertrophy Induced by Locally Activated Renin-Angiotensin System, 1324
Diabetic Nephropathy Is Associated With AGT Polymorphism T235: Results of a Family-Based Study, 627
Evaluation of the Angiotensinogen Locus in Human Essential Hypertension: A European Study, 725
Gender-Specific Association of M235T Polymorphism in Angiotensinogen Gene and Diabetic Nephropathy in NIDDM, 896
Increased Cardiac Angiotensin II Receptors in Angiotensinogen-Deficient Mice, 45
Intravenous Injection With Antisense Oligodeoxynucleotides Against Angiotensinogen Decreases Blood Pressure in Spontaneously Hypertensive Rats, 1166
Reduction of Cold-Induced Hypertension by Antisense Oligodeoxynucleotides to Angiotensinogen mRNA and AT_1-Receptor mRNA in Brain and Blood, 1317

Antagonists
Angiotensin AT_{1B} Receptor Mediates Calcium Signaling in Vascular Smooth Muscle Cells of AT_{1A} Receptor–Deficient Mice, 1171

Antihypertensive agents
Hypertension Optimal Treatment (HOT) Study: Home Blood Pressure in Treated Hypertensive Subjects, 1014

Antihypertensive treatment
Antihypertensive Treatment and the Responsiveness to Glutamate in Ventrolateral Medulla, 73

Antilipidemic agents
Effects of Lipid-Lowering Agents in the Dahl Salt-Sensitive Rat, 225
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232

Antisense elements
Augmentation of Aortic Ring Contractions by Angiotensin II Antisense Peptide, 854
Intravenous Injection With Antisense Oligodeoxynucleotides Against Angiotensinogen Decreases Blood Pressure in Spontaneously Hypertensive Rats, 1166
Reduction of Cold-Induced Hypertension by Antisense Oligodeoxynucleotides to Angiotensinogen mRNA and AT_1-Receptor mRNA in Brain and Blood, 1317

Antisense oligodeoxynucleotides
Na^+/H^+ Exchange in Vascular Smooth Muscle Cells Is Controlled by GTP-Binding Proteins, 259

Aorta
Losartan but Not Verapamil Inhibits Angiotensin II–Induced Tissue Endothelin-1 Increase: Role of Blood Pressure and Endothelial Function, 1305

Aortic rings
Dietary Sodium Restriction Impairs Endothelial Effect of Insulin, 1261

AP-1
Lysophosphatidylcholine Stimulates MAP Kinase Activity in Rat Vascular Smooth Muscle Cells, 248

Arachidonic acid
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Methacholine-Induced Contraction of Rabbit Pulmonary Artery: Role of Platelet-Endothelial Transcellular Thromboxane Synthesis, 206
N-Domain–Specific Substrate and C-Domain Inhibitors of Angiotensin-Converting Enzyme: Angiotensin-(1–7) and Keto-ACE, 912
Phospholipase A_2 Metabolites Regulate Inducible Nitric Oxide Synthase in Myocytes, 218

Arginine
Review of Alterations in Endothelial Nitric Oxide Production in Diabetes: Protective Role of Arginine on Endothelial Dysfunction, 1047
Vascular Smooth Muscle Nitric Oxide Synthase Anomalies in Dahl/Rapp Salt-Sensitive Rats, 918

L-Arginine
Enhanced Depressor Response to Nitric Oxide in the Rostral Ventrolateral Medulla of Spontaneously Hypertensive Rats, 1030
Role of Endogenous Nitric Oxide in the Brain Stem on the Rapid Adaptation of Baroreflex, 27
Arterial compliance
Opposite Effects of Remodeling and Hypertrophy on Arterial Compliance in Hypertension, 529
Arterial wall viscosity
Carotid Wall Viscosity Increase Is Related to Intima-Media Thickening in Hypertensive Patients, 534
Arteriolar injury
Renoprotective Effects of Felodipine and/or Enalapril in Spontaneously Hypertensive Rats With and Without L-NAME, 795
Arterioles
Estrogen Preserves Regulation of Shear Stress by Nitric Oxide in Arterioles of Female Hypertensive Rats, 309
Influence of Venular Prostaglandin Release on Arteriolar Diameter During Functional Hyperemia, 213
Interactive Nitric Oxide–Angiotensin II Influences on Renal Microcirculation in Angiotensin II–Induced Hypertension, 1255
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787
Atherosclerosis
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Blood Pressure Outcome of Angioplasty in Atherosclerotic Renal Artery Stenosis: A Randomized Trial, 823
Hypertensive Vascular Disease as a Cause of Death in Blacks Versus Whites: Autopsy Findings in 587 Adults, 1070
Atrial natriuretic peptide
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
Attention
Cerebral Blood Flow in Hypertensive Patients: An Initial Report of Reduced and Compensatory Blood Flow Responses During Performance of Two Cognitive Tasks, 1216
Autocrine
Adrenomedullin: A Possible Autocrine or Paracrine Inhibitor of Hypertrophy of Cardiomyocytes, 505
Autonomic nervous system
Baroreflex Control of Sympathetic Nerve Activity in Essential and Secondary Hypertension, 68
N_N-Nicotinic Blockade as an Acute Human Model of Autonomic Failure, 1178
White Coat Effect and Reactivity to Stress: Cardiovascular and Autonomic Nervous System Responses, 1021
Autopsy
Hypertensive Vascular Disease as a Cause of Death in Blacks Versus Whites: Autopsy Findings in 587 Adults, 1070
Autoregulation
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421

B

Baroreceptors
Baroreflex Control of Sympathetic Nerve Activity in Essential and Secondary Hypertension, 68
Chronic AT_1 Receptor Blockade Alters Aortic Nerve Activity in Hypertension, 973
Baroreflex
Neural and Hypotensive Effects of Angiotensin II Receptor Blockade, 378
Role of Endogenous Nitric Oxide in the Brain Stem on the Rapid Adaptation of Baroreflex, 27
White Coat Effect and Reactivity to Stress: Cardiovascular and Autonomic Nervous System Responses, 1021
Bax
Inhibition of Growth of Human Vascular Smooth Muscle Cells by Overexpression of p21 Gene Through Induction of Apoptosis, 493
Bcl-2
Inhibition of Growth of Human Vascular Smooth Muscle Cells by Overexpression of p21 Gene Through Induction of Apoptosis, 493
Behavior
Oxytocin Pathways Mediate the Cardiovascular and Behavioral Responses to Substance P in the Rat Brain, 480
Bimodality
Increased Urinary Free Cortisol: A Potential Intermediate Phenotype of Essential Hypertension, 569
Birth weight
Birth Weight Versus Childhood Growth as Determinants of Adult Blood Pressure, 145
Current and Birth Weights Exert Independent Influences on Nocturnal Pressure-Natriuresis Relationships in Normotensive Children, 546
Blacks
Birth Weight Versus Childhood Growth as Determinants of Adult Blood Pressure, 145
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
Seven-Year Incidence of Hypertension in a Cohort of Middle-Aged African Americans and Whites, 1130
Blood flow
Cerebral Blood Flow in Hypertensive Patients: An Initial Report of Reduced and Compensatory Blood Flow Responses During Performance of Two Cognitive Tasks, 1216
Inducible Nitric Oxide Synthase and Blood Pressure, 15
Role of Nitric Oxide in Adenosine-Induced Vasodilation in Humans, 1061
Systemic Hemodynamics and Regional Blood Flow During Chronic Nitric Oxide Synthesis Inhibition in Pregnant Rats, 315
Blood pressure
Antihypertensive Efficacy of Treatment Regimens Used in Veterans Administration Hypertension Clinics, 771
Antihypertensive Treatment and the Responsiveness to Glutamate in Ventrolateral Medulla, 73
Birth Weight Versus Childhood Growth as Determinants of Adult Blood Pressure, 145
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Calcitonin Gene-Related Peptide Is a Depressor in Subtotal Nephrectomy Hypertension, 391
Chronic AT_1 Receptor Blockade Alters Aortic Nerve Activity in Hypertension, 973
Chronic Leptin Infusion Increases Arterial Pressure, 409
Dietary Sodium Restriction Impairs Endothelial Effect of Insulin, 1261
Difference Between Clinic and Daytime Blood Pressure Is Not a Measure of the White Coat Effect, 1185
Effect on Blood Pressure of Potassium, Calcium, and Magnesium in Women With Low Habitual Intake, 131
Effects of AT_1 and AT_2 Angiotensin Receptor Antagonists in Angiotensin II–Infused Rats, 487
Enhanced Blood Pressure Sensitivity to Deoxycorticosterone in Mice With Disruption of Bradykinin B_2 Receptor Gene, 1278
Enhanced Vascular Reactivity During Inhibition of Nitric Oxide Synthesis in Pregnant Rats, 1065
Gene Expression of 11β-Hydroxysteroid Dehydrogenase Type 1 and Type 2 in the Kidneys of Insulin-Dependent Diabetic Rats, 885
Increased Glucocorticoid Activity in Men With Cardiovascular Risk Factors, 891
Independent Genetic Susceptibility to Cardiac Hypertrophy in Inherited Hypertension, 741
Influence of Nitric Oxide in the Chronic Phase of Two-Kidney, One Clip Renovascular Hypertension, 649
Insulin Resistance and Hypertension in Non-obese Africans in Tanzania, 114
Intravenous Injection With Antisense Oligodeoxynucleotides Against Angiotensinogen Decreases Blood Pressure in Spontaneously Hypertensive Rats, 1166
Kallikrein Gene Delivery Attenuates Hypertension and Cardiac Hypertrophy and Enhances Renal Function in Goldblatt Hypertensive Rats, 1104
Longitudinal Correlates of Change in Blood Pressure in Adolescent Girls, 97

Maintenance of Baseline Angiotensin II Potentiates Insulin Hypertension in Rats, 637
Neural and Hypotensive Effects of Angiotensin II Receptor Blockade, 378
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473
Oxytocin Pathways Mediate the Cardiovascular and Behavioral Responses to Substance P in the Rat Brain, 480
Red Blood Cell Sodium-Lithium Countertransport and Risk of Future Hypertension: The Olivetti Prospective Heart Study, 1284
Response of Proximal Tubules to Angiotensin II Changes During Maturation, 415
Role of the Adrenal Medullae in Male and Female DOCA-Salt Hypertensive Rats, 403
Seven-Year Incidence of Hypertension in a Cohort of Middle-Aged African Americans and Whites, 1130
Testosterone Exacerbates Hypertension and Reduces Pressure-Natriuresis in Male Spontaneously Hypertensive Rats, 435
Vasodepressor Actions of Angiotensin-(1–7) Unmasked During Combined Treatment With Lisinopril and Losartan, 699
Venous Tone in the Developmental Stages of Spontaneous Hypertension, 139

Blood pressure monitoring
Hypertension Optimal Treatment (HOT) Study: Home Blood Pressure in Treated Hypertensive Subjects, 1014
Treatment With Enalapril Modifies the Pain Perception Pattern in Hypertensive Patients, 1146
White Coat Effect and Reactivity to Stress: Cardiovascular and Autonomic Nervous System Responses, 1021

Blood pressure monitoring, ambulatory
Circadian Blood Pressure Variation in Hypertensive Patients With Primary Hyperaldosteronism, 843
Current and Birth Weights Exert Independent Influences on Nocturnal Pressure-Natriuresis Relationships in Normotensive Children, 546
Difference Between Clinic and Daytime Blood Pressure Is Not a Measure of the White Coat Effect, 1185
Effect on Blood Pressure of Potassium, Calcium, and Magnesium in Women With Low Habitual Intake, 131
Ethnic Differences in the Hypertensive Heart and 24-Hour Blood Pressure Profile, 1190
Hemodilution Reduces Clinic and Ambulatory Blood Pressure in Polycythemic Patients, 848
Hypertension Is Related to Cognitive Impairment: A 20-Year Follow-up of 999 Men, 780
Prognostic Value of Ambulatory Blood Pressure Monitoring in Refractory Hypertension: A Prospective Study, 712
Target-Organ Damage in Stage I Hypertensive Subjects With White Coat and Sustained Hypertension: Results From the HARVEST Study, 57

Blood pressure, nocturnal
Relationship Between Extreme Dippers and Orthostatic Hypertension in Elderly Hypertensive Patients, 77

Blood pressure variability
Circadian Blood Pressure Variation in Hypertensive Patients With Primary Hyperaldosteronism, 843

Blood vessels
Increased Glucocorticoid Activity in Men With Cardiovascular Risk Factors, 891

Blood viscosity
Hemodilution Reduces Clinic and Ambulatory Blood Pressure in Polycythemic Patients, 848

Body mass index
Genetic Markers at the Leptin (*OB*) Locus Are Not Significantly Linked to Hypertension in African Americans, 1230

Bradykinin
Acute ACE Inhibition Causes Plasma Extravasation in Mice That is Mediated by Bradykinin and Substance P, 1299
AT_2 Receptor Stimulation Increases Aortic Cyclic GMP in SHRSP by a Kinin-Dependent Mechanism, 349
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39
N-Domain–Specific Substrate and C-Domain Inhibitors of Angiotensin-Converting Enzyme: Angiotensin-(1–7) and Keto-ACE, 912
Persistent Reduction in Renal Nerve Growth Factor mRNA After Perindopril Treatment of Young Spontaneously Hypertensive Rats, 678
Role of Ca^{2+}-Activated K^+ Channels in the Protective Effect of ACE Inhibition Against Ischemic Myocardial Injury, 1290
Role of Phospholipase A_2 Isozymes in Agonist-Mediated Signaling in Proximal Tubular Epithelium, 809
Role of Tyrosine Kinase in Dilator Responses of Rat Basilar Artery In Vivo, 861

Brain
Oxytocin Pathways Mediate the Cardiovascular and Behavioral Responses to Substance P in the Rat Brain, 480

Brain stem
Role of Endogenous Nitric Oxide in the Brain Stem on the Rapid Adaptation of Baroreflex, 27

Bufodienolides
Characterization of a Urinary Bufodienolide Na^+,K^+-ATPase Inhibitor in Patients After Acute Myocardial Infarction, 1097

Bumetanide
Electroneutral Na-Coupled Cotransporter Expression in the Kidney During Variations of NaCl and Water Metabolism, 1002

Bupivacaine
Eclamptic Plasma Stimulates Norepinephrine Release in Cultured Sympathetic Nerve, 1343

C

Ca^{2+} uptake
Na^+/H^+ Exchange in Vascular Smooth Muscle Cells Is Controlled by GTP-Binding Proteins, 259

Calcitonin gene-related peptide
Calcitonin Gene-Related Peptide Is a Depressor in Subtotal Nephrectomy Hypertension, 391

Calcium
Calcium and Protein Kinase C Mediate High-Glucose-Induced Inhibition of Inducible Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 289
Effect on Blood Pressure of Potassium, Calcium, and Magnesium in Women With Low Habitual Intake, 131
Enhanced Vascular Reactivity During Inhibition of Nitric Oxide Synthesis in Pregnant Rats, 1065
Prostaglandin E_2–Induced Aldosterone Release Is Mediated by an EP_2 Receptor, 575
Role of Mitogen-Activated Protein Kinase in the Angiotensin II–Induced DNA Synthesis in Vascular Smooth Muscle Cells, 1151

Calcium antagonist converting enzyme inhibitors
Renal Changes Induced by Nitric Oxide and Prostaglandin Synthesis Reduction: Effects of Trandolapril and Verapamil, 657

Calcium antagonists
Efficient Inhibition of the Development of Cardiac Remodeling by a Long-Acting Calcium Antagonist Amlodipine, 32

Calcium channels
Angiotensin AT_{1B} Receptor Mediates Calcium Signaling in Vascular Smooth Muscle Cells of AT_{1A} Receptor–Deficient Mice, 1171
Effects of a Novel Antihypertensive Drug, Cilnidipine, on Catecholamine Secretion From Differentiated PC12 Cells, 1195
Influence of Race and Dietary Salt on the Antihypertensive Efficacy of an Angiotensin-Converting Enzyme Inhibitor or a Calcium Channel Antagonist in Salt-Sensitive Hypertensives, 1088
Single L-Type Calcium Channels in Smooth Muscle Cells From Resistance Arteries of Spontaneously Hypertensive Rats, 1125

Calcium, cytoplasmic
Effects of a Novel Antihypertensive Drug, Cilnidipine, on Catecholamine Secretion From Differentiated PC12 Cells, 1195

Calcium ion concentration
Mechanisms Responsible for Forskolin-Induced Relaxation of Rat Tail Artery, 872

Calcium mobilization
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421

Calcium transport
Ca^{2+} in the Dense Tubules: A Model of Platelet Ca^{2+} Load, 595

Capillaries
Three-Dimensional Microcomputed Tomography of Renal Vasculature in Rats, 440
Captopril
Acute ACE Inhibition Causes Plasma Extravasation in Mice That is Mediated by Bradykinin and Substance P, 1299
Cardiac fibroblast
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Integrins, Adhesion, and Cardiac Remodeling, 176
Cardiac glycosides
Different Signaling Pathways Mediate Stimulated Secretions Of Endogenous Ouabain and Aldosterone From Bovine Adrenocortical Cells, 463
Cardiac myocytes
Phospholipase A_2 Metabolites Regulate Inducible Nitric Oxide Synthase in Myocytes, 218
Cardiac remodeling
Efficient Inhibition of the Development of Cardiac Remodeling by a Long-Acting Calcium Antagonist Amlodipine, 32
Cardiomyocytes
Adrenomedullin: A Possible Autocrine or Paracrine Inhibitor of Hypertrophy of Cardiomyocytes, 505
Cardiomyopathy
Streptozotocin-Induced Diabetes Enhances Cardiac Heparin-Releasable Lipoprotein Lipase Activity in Spontaneously Hypertensive Rats, 878
Cardiovascular diseases
Chlamydia Pneumoniae Antibodies in Severe Essential Hypertension, 589
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Hypertension Optimal Treatment (HOT) Study: Home Blood Pressure in Treated Hypertensive Subjects, 1014
Hypertensive Vascular Disease as a Cause of Death in Blacks Versus Whites: Autopsy Findings in 587 Adults, 1070
Cardiovascular risk
Insulin, Sodium-Lithium Countertransport, and Microalbuminuria in Hypertensive Patients, 110
Case-control studies
Lack of Association Between the α-Adducin Locus and Essential Hypertension in the Japanese Population, 730
Three Important Subgroups of Hypertensive Persons at Greater Risk of Intracerebral Hemorrhage, 1223
Catecholamines
AT_1 and AT_2 Receptor Blockade and Epinephrine Release During Insulin-Induced Hypoglycemia, 384
Effects of Angiotensin II Type 1 Receptor Blockade and Angiotensin-Converting Enzyme Inhibition on Cardiac β-Adrenergic Signal Transduction, 747
N_N-Nicotinic Blockade as an Acute Human Model of Autonomic Failure, 1178
Cell culture
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
Cell cycle regulatory gene
Inhibition of Growth of Human Vascular Smooth Muscle Cells by Overexpression of p21 Gene Through Induction of Apoptosis, 493
Cerebral arteries
Endothelin-1 Regulates Tone of Isolated Small Arteries in the Rat: Effect of Hyperendothelinemia, 1035
Role of Tyrosine Kinase in Dilator Responses of Rat Basilar Artery In Vivo, 861
Cerebral hemorrhage
Three Important Subgroups of Hypertensive Persons at Greater Risk of Intracerebral Hemorrhage, 1223
Cerebrovascular disease
Intracranial Aneurysm and Hemorrhagic Stroke in Glucocorticoid-remediable Aldosteronism, 445
Chick embryo
Eclamptic Plasma Stimulates Norepinephrine Release in Cultured Sympathetic Nerve, 1343
Children
Current and Birth Weights Exert Independent Influences on Nocturnal Pressure-Natriuresis Relationships in Normotensive Children, 546
Chloride
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
Cholesterol
Effect of Renin Gene Transfer on Blood Pressure in the Spontaneously Hypertensive Rat, 373
Relation of Left Ventricular Midwall Function to Cardiovascular Risk Factors and Arterial Structure and Function, 929
Chymase
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925
Cilnidipine
Effects of a Novel Antihypertensive Drug, Cilnidipine, on Catecholamine Secretion From Differentiated PC12 Cells, 1195
c-Jun NH_2–terminal kinase
Cardiac Mitogen-Activated Protein Kinase Activities Are Chronically Increased in Stroke-Prone Hypertensive Rats, 50
Clinical trials
Hypertension Optimal Treatment (HOT) Study: Home Blood Pressure in Treated Hypertensive Subjects, 1014
Cognition
Hypertension Is Related to Cognitive Impairment: A 20-Year Follow-up of 999 Men, 780
Collagen
Adenosine Inhibits Collagen and Protein Synthesis in Cardiac Fibroblasts: Role of A_{2B} Receptors, 943
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Transforming Growth Factor-β and Receptor Tyrosine Kinase–Activating Growth Factors Negatively Regulate Collagen Genes in Smooth Muscle of Hypertensive Rats, 986
Congenic
Effect of Renin Gene Transfer on Blood Pressure in the Spontaneously Hypertensive Rat, 373
Constitutive secretion
Endothelin-Converting Enzyme: Ultrastructural Localization and Its Recycling From the Cell Surface, 3
Contractility
Myocardial Contractile Efficiency and Oxygen Cost of Contractility Are Preserved During Transition From Compensated Hypertrophy to Failure in Rats With Salt-Sensitive Hypertension, 949
Relation of Left Ventricular Midwall Function to Cardiovascular Risk Factors and Arterial Structure and Function, 929
Contraction
Enhanced Vascular Reactivity During Inhibition of Nitric Oxide Synthesis in Pregnant Rats, 1065
Coronary artery
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Effect of Selective Inhibition of Soluble Guanylyl Cyclase on the K_{Ca} Channel Activity in Coronary Artery Smooth Muscle, 303
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Corticosterone
Localization of 2 11β-OH Steroid Dehydrogenase Isoforms in Aortic Endothelial Cells, 459
Cortisol
Increased Urinary Free Cortisol: A Potential Intermediate Phenotype of Essential Hypertension, 569
Cough
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925
CP-96,345
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473
Cyclic AMP
Cyclic AMP-Adenosine Pathway Induces Nitric Oxide Synthesis in Aortic Smooth Muscle Cells, 296
Prostaglandin E_2–Induced Aldosterone Release Is Mediated by an EP_2 Receptor, 575
Response of Proximal Tubules to Angiotensin II Changes During Maturation, 415

Trapidil Inhibits Platelet-Derived Growth Factor–Stimulated Mitogen-Activated Protein Kinase Cascade, 665
Cyclic GMP
AT_2 Receptor Stimulation Increases Aortic Cyclic GMP in SHRSP by a Kinin-Dependent Mechanism, 349
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
Cyclic strain
Cyclic Strain–Induced Reactive Oxygen Species Involved in ICAM-1 Gene Induction in Endothelial Cells, 125
Cyclooxygenase
Coordinate Expression of Cyclooxygenase-2 and Renin in the Rat Kidney in Renovascular Hypertension, 201
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Linoleic Acid Induces Relaxation and Hyperpolarization of the Pig Coronary Artery, 615
Methacholine-Induced Contraction of Rabbit Pulmonary Artery: Role of Platelet-Endothelial Transcellular Thromboxane Synthesis, 206
Phospholipase A_2 Metabolites Regulate Inducible Nitric Oxide Synthase in Myocytes, 218
Role of Eicosanoids in Angiotensin-Dependent Hypertension, 194
Cyclopiazonic acid
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421
Cytochrome P450
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Effects of Lipid-Lowering Agents in the Dahl Salt-Sensitive Rat, 225
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Cytokines
Resistance to Endotoxin Shock in Spontaneously Hypertensive Rats, 1350

D

DA2 receptor
Dopamine-2 Receptor Blockade Potentiates the Renal Effects of Nitric Oxide Inhibition in Humans, 277
Developing countries
Knowledge, Attitudes, and Practices on Hypertension in a Country in Epidemiological Transition, 1136
Diabetes
Gender-Specific Association of M235T Polymorphism in Angiotensinogen Gene and Diabetic Nephropathy in NIDDM, 896
Gene Expression of 11β-Hydroxysteroid Dehydrogenase Type 1 and Type 2 in the Kidneys of Insulin-Dependent Diabetic Rats, 885
Hypertension Is Related to Cognitive Impairment: A 20-Year Follow-up of 999 Men, 780
Identification of Human Plasma Kallikrein Gene Polymorphisms and Evaluation of Their Role in End-Stage Renal Disease, 906
Review of Alterations in Endothelial Nitric Oxide Production in Diabetes: Protective Role of Arginine on Endothelial Dysfunction, 1047
Streptozotocin-Induced Diabetes Enhances Cardiac Heparin-Releasable Lipoprotein Lipase Activity in Spontaneously Hypertensive Rats, 878
Diabetes, insulin-dependent
Diabetic Nephropathy Is Associated With AGT Polymorphism T235: Results of a Family-Based Study, 627
Diagnostic test
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Diastole
Low-Dose C-Type Natriuretic Peptide Does Not Affect Cardiac and Renal Function in Humans, 802
Diet
Effect on Blood Pressure of Potassium, Calcium, and Magnesium in Women With Low Habitual Intake, 131
Digitalis-like factors
Characterization of a Urinary Bufodienolide Na^+,K^+-ATPase Inhibitor in Patients After Acute Myocardial Infarction, 1097
Dipeptidyl carboxypeptidase
Metabolism of Angiotensin-(1–7) by Angiotensin-Converting Enzyme, 362
Diuretics
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
DOCA-salt hypertension
Role of the Adrenal Medullae in Male and Female DOCA-Salt Hypertensive Rats, 403
Dopamine
Effects of a Novel Antihypertensive Drug, Cilnidipine, on Catecholamine Secretion From Differentiated PC12 Cells, 1195
Dorsal medulla
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473
Dose response
Dose-Related Efficacy of Irbesartan for Hypertension: An Integrated Analysis, 1311
Drug efficacy
Antihypertensive Efficacy of Treatment Regimens Used in Veterans Administration Hypertension Clinics, 771

E

Echocardiography
Low-Dose C-Type Natriuretic Peptide Does Not Affect Cardiac and Renal Function in Humans, 802
Relation of Left Ventricular Midwall Function to Cardiovascular Risk Factors and Arterial Structure and Function, 929
Target-Organ Damage in Stage I Hypertensive Subjects With White Coat and Sustained Hypertension: Results From the HARVEST Study, 57
Time-Voltage QRS Area of the 12-Lead Electrocardiogram: Detection of Left Ventricular Hypertrophy, 937
Eclampsia
Eclamptic Plasma Stimulates Norepinephrine Release in Cultured Sympathetic Nerve, 1343
Eicosanoids
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Role of Eicosanoids in Angiotensin-Dependent Hypertension, 194
Elderly
Relationship Between Extreme Dippers and Orthostatic Hypertension in Elderly Hypertensive Patients, 77
Trends in Hypertension Prevalence, Treatment, and Control: In a Well-Defined Older Population, 552
Electrocardiography
Time-Voltage QRS Area of the 12-Lead Electrocardiogram: Detection of Left Ventricular Hypertrophy, 937
Electrophysiology
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
Single L-Type Calcium Channels in Smooth Muscle Cells From Resistance Arteries of Spontaneously Hypertensive Rats, 1125
Stretch-Activated Channels in Arterial Smooth Muscle of Genetic Hypertensive Rats, 254
Enalapril
Additive Effects of Enalapril and Losartan in (mREN-2)27 Transgenic Rats, 692
Treatment With Enalapril Modifies the Pain Perception Pattern in Hypertensive Patients, 1146
Enalaprilat
Metabolism of Angiotensin-(1–7) by Angiotensin-Converting Enzyme, 362
Endothelial cells
Cyclic Strain–Induced Reactive Oxygen Species Involved in ICAM-1 Gene Induction in Endothelial Cells, 125
Effects of Mechanical Forces on Signal Transduction and Gene Expression in Endothelial Cells, 162
Localization of 2 11β-OH Steroid Dehydrogenase Isoforms in Aortic Endothelial Cells, 459

Methacholine-Induced Contraction of Rabbit Pulmonary Artery: Role of Platelet-Endothelial Transcellular Thromboxane Synthesis, 206

Endothelin
Endothelin-1 Regulates Tone of Isolated Small Arteries in the Rat: Effect of Hyperendothelinemia, 1035
Endothelin-Converting Enzyme: Ultrastructural Localization and Its Recycling From the Cell Surface, 3
ET_A Receptor Blockade Prevents Increased Tissue Endothelin-1, Vascular Hypertrophy, and Endothelial Dysfunction in Salt-Sensitive Hypertension, 499
Growth Factors and Mitogen-Activated Protein Kinases, 152
Losartan but Not Verapamil Inhibits Angiotensin II–Induced Tissue Endothelin-1 Increase: Role of Blood Pressure and Endothelial Function, 1305
Nephroprotection of an ET_A-Receptor Blocker (LU 135252) in Salt-Loaded Uninephrectomized Stroke-Prone Spontaneously Hypertensive Rats, 995
Prevention of the Cardiovascular and Renal Effects of Angiotensin II by Endothelin Blockade, 10

Endothelium
Angiotensin-Converting Enzyme Gene Polymorphism Is Associated With Endothelium-Dependent Vasodilation in Never Treated Hypertensive Patients, 900
Chronic Oral Endothelin Type A Receptor Antagonism in Experimental Heart Failure, 766
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Effect of Selective Inhibition of Soluble Guanylyl Cyclase on the K_{Ca} Channel Activity in Coronary Artery Smooth Muscle, 303
Endothelial Dysfunction in Hypertension Is Independent From the Etiology and From Vascular Structure, 335
ET_A Receptor Blockade Prevents Increased Tissue Endothelin-1, Vascular Hypertrophy, and Endothelial Dysfunction in Salt-Sensitive Hypertension, 499
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Influence of Venular Prostaglandin Release on Arteriolar Diameter During Functional Hyperemia, 213
Insulin-Mediated Venodilation Is Impaired in Patients With High Cholesterol, 1266
Losartan but Not Verapamil Inhibits Angiotensin II–Induced Tissue Endothelin-1 Increase: Role of Blood Pressure and Endothelial Function, 1305
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787
Relationship Between Endothelial Function and Fibrinolysis in Early Hypertension, 321
Review of Alterations in Endothelial Nitric Oxide Production in Diabetes: Protective Role of Arginine on Endothelial Dysfunction, 1047
Role of Phospholipase A_2 Isozymes in Agonist-Mediated Signaling in Proximal Tubular Epithelium, 809
Vascular Function in the Vitamin E–Deprived Rat: An Interaction Between Nitric Oxide and Superoxide Anions, 830

Endothelium-derived contracting factor
Methacholine-Induced Contraction of Rabbit Pulmonary Artery: Role of Platelet-Endothelial Transcellular Thromboxane Synthesis, 206

Endothelium-derived hyperpolarizing factor
Linoleic Acid Induces Relaxation and Hyperpolarization of the Pig Coronary Artery, 615

Endothelium-derived relaxing factor
Endothelial Dysfunction in Hypertension Is Independent From the Etiology and From Vascular Structure, 335
Upregulation of Renal and Vascular Nitric Oxide Synthase in Young Spontaneously Hypertensive Rats, 1248
Vascular Smooth Muscle Nitric Oxide Synthase Anomalies in Dahl/Rapp Salt-Sensitive Rats, 918

Endotoxins
Resistance to Endotoxin Shock in Spontaneously Hypertensive Rats, 1350

Enzymes
N-Domain–Specific Substrate and C-Domain Inhibitors of Angiotensin-Converting Enzyme: Angiotensin-(1–7) and Keto-ACE, 912

Epidemiology
Knowledge, Attitudes, and Practices on Hypertension in a Country in Epidemiological Transition, 1136

Chronic Leptin Infusion Increases Arterial Pressure, 409
Neural and Hypotensive Effects of Angiotensin II Receptor Blockade, 378
Oxytocin Pathways Mediate the Cardiovascular and Behavioral Responses to Substance P in the Rat Brain, 480
Role of the Adrenal Medullae in Male and Female DOCA-Salt Hypertensive Rats, 403
Hemodialysis
Efficacy and Tolerability of Losartan in Hypertensive Patients With Renal Impairment, 684
Hemodilution
Hemodilution Reduces Clinic and Ambulatory Blood Pressure in Polycythemic Patients, 848
Hemodynamics
Dopamine-2 Receptor Blockade Potentiates the Renal Effects of Nitric Oxide Inhibition in Humans, 277
Effects of Mechanical Forces on Signal Transduction and Gene Expression in Endothelial Cells, 162
Interaction Between Body Size and Cardiac Workload: Influence on Left Ventricular Mass During Body Growth and Adulthood, 1077
Low-Dose C-Type Natriuretic Peptide Does Not Affect Cardiac and Renal Function in Humans, 802
Prevention of the Cardiovascular and Renal Effects of Angiotensin II by Endothelin Blockade, 10
Hemorheology
Hemodilution Reduces Clinic and Ambulatory Blood Pressure in Polycythemic Patients, 848
Hemorrhagic stroke
Intracranial Aneurysm and Hemorrhagic Stroke in Glucocorticoid-remediable Aldosteronism, 445
Heparin
Streptozotocin-Induced Diabetes Enhances Cardiac Heparin-Releasable Lipoprotein Lipase Activity in Spontaneously Hypertensive Rats, 878
Hormone replacement therapy
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Human
Dopamine-2 Receptor Blockade Potentiates the Renal Effects of Nitric Oxide Inhibition in Humans, 277
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
Neural and Hypotensive Effects of Angiotensin II Receptor Blockade, 378
Hydroxyeicosatetraenoic acids
Cytochrome P-450 Metabolites Mediate Norepinephrine-Induced Mitogenic Signaling, 242
Effects of Lipid-Lowering Agents in the Dahl Salt-Sensitive Rat, 225
11β-Hydroxylase
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
11β-Hydroxysteroid dehydrogenase
Gene Expression of 11β-Hydroxysteroid Dehydrogenase Type 1 and Type 2 in the Kidneys of Insulin-Dependent Diabetic Rats, 885
Impact of Dietary Na^+ on Glycyrrhetinic Acid-Like Factors (Kidney 11β-(HSD2)-GALFs) in Human Essential Hypertension, 469
Localization of 2 11β-OH Steroid Dehydrogenase Isoforms in Aortic Endothelial Cells, 459
Hyperaldosteronism
Circadian Blood Pressure Variation in Hypertensive Patients With Primary Hyperaldosteronism, 843
Intracranial Aneurysm and Hemorrhagic Stroke in Glucocorticoid-remediable Aldosteronism, 445
Hyperbaric index
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Hypercholesterolemia
Insulin-Mediated Venodilation Is Impaired in Patients With High Cholesterol, 1266
Hyperemia
Influence of Venular Prostaglandin Release on Arteriolar Diameter During Functional Hyperemia, 213
Hyperglycemia
Calcium and Protein Kinase C Mediate High-Glucose-Induced Inhibition of Inducible Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 289
Hyperplasia
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Angiotensin II Induces Vascular Smooth Muscle Cell Replication Independent of Blood Pressure, 1331
Hypertension
Acute Effects of Blood Pressure Elevation on Insulin Clearance in Normotensive Healthy Subjects, 104
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Angiotensin-(1–7) Contributes to the Antihypertensive Effects of Blockade of the Renin-Angiotensin System, 356
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Carotid Wall Viscosity Increase Is Related to Intima-Media Thickening in Hypertensive Patients, 534
Chronic Leptin Infusion Increases Arterial Pressure, 409
Dissociation Between Muscle and Skin Sympathetic Nerve Activity in Essential Hypertension, Obesity, and Congestive Heart Failure, 64
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Effect of Renin Gene Transfer on Blood Pressure in the Spontaneously Hypertensive Rat, 373
Endothelin-A Receptor Antagonism Attenuates the Hypertension and Renal Injury in Dahl Salt-Sensitive Rats, 397
Impact of Dietary Na^+ on Glycyrrhetinic Acid-Like Factors (Kidney 11β-(HSD2)-GALFs) in Human Essential Hypertension, 469
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Localization of 2 11β-OH Steroid Dehydrogenase Isoforms in Aortic Endothelial Cells, 459
Mineralocorticoid Blockade Reduces Vascular Injury in Stroke-Prone Hypertensive Rats, 451
Modulation of Blood Pressure in the Dahl SS/jr Rat by Embryo Transfer, 540

Opposite Effects of Remodeling and Hypertrophy on Arterial Compliance in Hypertension, 529
Medulla oblongata
Enhanced Depressor Response to Nitric Oxide in the Rostral Ventrolateral Medulla of Spontaneously Hypertensive Rats, 1030
Membrane potential
Mechanisms Responsible for Forskolin-Induced Relaxation of Rat Tail Artery, 872
Memory
Cerebral Blood Flow in Hypertensive Patients: An Initial Report of Reduced and Compensatory Blood Flow Responses During Performance of Two Cognitive Tasks, 1216
Spontaneously Hypertensive Rats: A Potential Model to Identify Drugs for Treatment of Learning Disorders, 968
Mesenteric arteries
Angiotensin II Induces Vascular Smooth Muscle Cell Replication Independent of Blood Pressure, 1331
Endothelin-1 Regulates Tone of Isolated Small Arteries in the Rat: Effect of Hyperendothelinemia, 1035
Metabolism
Acute Effects of Blood Pressure Elevation on Insulin Clearance in Normotensive Healthy Subjects, 104
Mice
Increased Cardiac Angiotensin II Receptors in Angiotensinogen-Deficient Mice, 45
Mice, transgenic
Blood Pressure–Independent Cardiac Hypertrophy Induced by Locally Activated Renin-Angiotensin System, 1324
Regulatory Elements Required for Human Angiotensinogen Expression in HepG2 Cells Are Dispensable in Transgenic Mice, 734
Microalbuminuria
Insulin, Sodium-Lithium Countertransport, and Microalbuminuria in Hypertensive Patients, 110
Target-Organ Damage in Stage I Hypertensive Subjects With White Coat and Sustained Hypertension: Results From the HARVEST Study, 57
Microcirculation
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421
Three-Dimensional Microcomputed Tomography of Renal Vasculature in Rats, 440
Microinjection
Enhanced Depressor Response to Nitric Oxide in the Rostral Ventrolateral Medulla of Spontaneously Hypertensive Rats, 1030
Microsatellite repeats
Evaluation of the Angiotensinogen Locus in Human Essential Hypertension: A European Study, 725
Microsatellites
Salt Susceptibility Maps to Chromosomes 1 and 17 With Sex Specificity in the Sabra Rat Model of Hypertension, 119
Microscopy
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787
Microvascular permeability
Vascular Endothelial Growth Factor mRNA in Pericytes Is Upregulated by Phorbol Myristate Acetate, 511
Mineralocorticoids
Enhanced Blood Pressure Sensitivity to Deoxycorticosterone in Mice With Disruption of Bradykinin B_2 Receptor Gene, 1278
Mitogen-activated protein kinase
Lysophosphatidylcholine Stimulates MAP Kinase Activity in Rat Vascular Smooth Muscle Cells, 248
Role of Phospholipase A_2 Isozymes in Agonist-Mediated Signaling in Proximal Tubular Epithelium, 809
Mitogenesis
Cytochrome P-450 Metabolites Mediate Norepinephrine-Induced Mitogenic Signaling, 242
Trapidil Inhibits Platelet-Derived Growth Factor–Stimulated Mitogen-Activated Protein Kinase Cascade, 665
Models
Spontaneously Hypertensive Rats: A Potential Model to Identify Drugs for Treatment of Learning Disorders, 968

Monoclonal antibody
Adrenomedullin: A Possible Autocrine or Paracrine Inhibitor of Hypertrophy of Cardiomyocytes, 505
Vascular Endothelial Growth Factor mRNA in Pericytes Is Upregulated by Phorbol Myristate Acetate, 511
Monocyte
Cyclic Strain–Induced Reactive Oxygen Species Involved in ICAM-1 Gene Induction in Endothelial Cells, 125
MRNA
Angiotensin II Stimulates Synthesis of Endothelial Nitric Oxide Synthase, 283
Muscle, smooth
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Angiotensin II Induces Vascular Smooth Muscle Cell Replication Independent of Blood Pressure, 1331
Cyclic AMP-Adenosine Pathway Induces Nitric Oxide Synthesis in Aortic Smooth Muscle Cells, 296
Enhanced Vascular Reactivity During Inhibition of Nitric Oxide Synthesis in Pregnant Rats, 1065
Muscle, smooth, vascular
Abnormal Regulation of Transforming Growth Factor-β Receptors on Vascular Smooth Muscle Cells From Spontaneously Hypertensive Rats by Angiotensin II, 672
Angiotensin AT_{1B} Receptor Mediates Calcium Signaling in Vascular Smooth Muscle Cells of AT_{1A} Receptor–Deficient Mice, 1171
Augmentation of Aortic Ring Contractions by Angiotensin II Antisense Peptide, 854
Calcium and Protein Kinase C Mediate High-Glucose-Induced Inhibition of Inducible Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 289
Cytochrome P-450 Metabolites Mediate Norepinephrine-Induced Mitogenic Signaling, 242
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Downregulation of Angiotensin II Type 1 Receptor Gene Transcription by Nitric Oxide, 342
Effects of AT_1 and AT_2 Angiotensin Receptor Antagonists in Angiotensin II–Infused Rats, 487
Lysophosphatidylcholine Stimulates MAP Kinase Activity in Rat Vascular Smooth Muscle Cells, 248
Na^+/H^+ Exchange in Vascular Smooth Muscle Cells Is Controlled by GTP-Binding Proteins, 259
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978
Relaxin Activates the L-Arginine–Nitric Oxide Pathway in Vascular Smooth Muscle Cells in Culture, 1240
Role of Mitogen-Activated Protein Kinase in the Angiotensin II–Induced DNA Synthesis in Vascular Smooth Muscle Cells, 1151
Salt Induces Vascular AT_1 Receptor Overexpression In Vitro and In Vivo, 1272
Single L-Type Calcium Channels in Smooth Muscle Cells From Resistance Arteries of Spontaneously Hypertensive Rats, 1125
Sodium Induces Hypertrophy of Cultured Myocardial Myoblasts and Vascular Smooth Muscle Cells, 1083
Strain-Responsive Regions in the Platelet-Derived Growth Factor-A Gene Promoter, 170
Stretch-Activated Channels in Arterial Smooth Muscle of Genetic Hypertensive Rats, 254
Transforming Growth Factor-β and Receptor Tyrosine Kinase–Activating Growth Factors Negatively Regulate Collagen Genes in Smooth Muscle of Hypertensive Rats, 986
Vascular β-Adrenergic Receptor Adenylyl Cyclase System From Renin-Transgenic Hypertensive Rats, 1157
Mutagenesis
Regulatory Elements Required for Human Angiotensinogen Expression in HepG2 Cells Are Dispensable in Transgenic Mice, 734
Myocardial infarction
Adenosine Inhibits Collagen and Protein Synthesis in Cardiac Fibroblasts: Role of A_{2B} Receptors, 943
Characterization of a Urinary Bufodienolide Na^+,K^+-ATPase Inhibitor in Patients After Acute Myocardial Infarction, 1097
Myocardial myoblasts
Sodium Induces Hypertrophy of Cultured Myocardial Myoblasts and Vascular Smooth Muscle Cells, 1083
Myosin heavy chain
Efficient Inhibition of the Development of Cardiac Remodeling by a Long-Acting Calcium Antagonist Amlodipine, 32

N

Na^+-K^+-ATPase
Characterization of a Urinary Bufodienolide Na^+,K^+-ATPase Inhibitor in Patients After Acute Myocardial Infarction, 1097
Na^+/H^+ exchange
Na^+/H^+ Exchange in Vascular Smooth Muscle Cells Is Controlled by GTP-Binding Proteins, 259
Na^+/K^+-ATPase inhibitor
Linoleic Acid Induces Relaxation and Hyperpolarization of the Pig Coronary Artery, 615
Natriuresis
Evolution of Chronic Nitric Oxide Inhibition Hypertension: Relationship to Renal Function, 21
Salidiuretic Action by Genistein in the Isolated, Perfused Rat Kidney, 706
Natriuretic peptides
Chronic Oral Endothelin Type A Receptor Antagonism in Experimental Heart Failure, 766
Low-Dose C-Type Natriuretic Peptide Does Not Affect Cardiac and Renal Function in Humans, 802
Nephropathy
Gender-Specific Association of M235T Polymorphism in Angiotensinogen Gene and Diabetic Nephropathy in NIDDM, 896
Insulin, Sodium-Lithium Countertransport, and Microalbuminuria in Hypertensive Patients, 110
Mutations and Variants of the Epithelial Sodium Channel Gene in Liddle's Syndrome and Primary Hypertension, 1118
Nephropathy, diabetic
Diabetic Nephropathy Is Associated With AGT Polymorphism T235: Results of a Family-Based Study, 627
Nephrosclerosis
Renoprotective Effects of Felodipine and/or Enalapril in Spontaneously Hypertensive Rats With and Without L-NAME, 795
Neprilysin
Angiotensin-(1–7) Contributes to the Antihypertensive Effects of Blockade of the Renin-Angiotensin System, 356
Nerve growth factor
Persistent Reduction in Renal Nerve Growth Factor mRNA After Perindopril Treatment of Young Spontaneously Hypertensive Rats, 678
Neurohormones
Chronic Oral Endothelin Type A Receptor Antagonism in Experimental Heart Failure, 766
Neuropeptides
Calcitonin Gene-Related Peptide Is a Depressor in Subtotal Nephrectomy Hypertension, 391
Neuropsychology
Cerebral Blood Flow in Hypertensive Patients: An Initial Report of Reduced and Compensatory Blood Flow Responses During Performance of Two Cognitive Tasks, 1216
Neutrophils
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Nifedipine
Efficient Inhibition of the Development of Cardiac Remodeling by a Long-Acting Calcium Antagonist Amlodipine, 32
Nitric oxide
AT_2 Receptor Stimulation Increases Aortic Cyclic GMP in SHRSP by a Kinin-Dependent Mechanism, 349
Cyclic AMP-Adenosine Pathway Induces Nitric Oxide Synthesis in Aortic Smooth Muscle Cells, 296
Distinct Endothelial Impairment in Coronary Microvessels from Hypertensive Dahl Rats, 328
Dopamine-2 Receptor Blockade Potentiates the Renal Effects of Nitric Oxide Inhibition in Humans, 277
Downregulation of Angiotensin II Type 1 Receptor Gene Transcription by Nitric Oxide, 342
Effect of Selective Inhibition of Soluble Guanylyl Cyclase on the K_{Ca} Channel Activity in Coronary Artery Smooth Muscle, 303

Endothelial Dysfunction in Hypertension Is Independent From the Etiology and From Vascular Structure, 335
Estrogen Preserves Regulation of Shear Stress by Nitric Oxide in Arterioles of Female Hypertensive Rats, 309
ET_A Receptor Blockade Prevents Increased Tissue Endothelin-1, Vascular Hypertrophy, and Endothelial Dysfunction in Salt-Sensitive Hypertension, 499
Evolution of Chronic Nitric Oxide Inhibition Hypertension: Relationship to Renal Function, 21
Inducible Nitric Oxide Synthase and Blood Pressure, 15
Influence of Nitric Oxide in the Chronic Phase of Two-Kidney, One Clip Renovascular Hypertension, 649
Interactive Nitric Oxide–Angiotensin II Influences on Renal Microcirculation in Angiotensin II–Induced Hypertension, 1255
Linoleic Acid Induces Relaxation and Hyperpolarization of the Pig Coronary Artery, 615
Nitric Oxide in Hypertension: Relationship With Renal Injury and Left Ventricular Hypertrophy, 189
Protective Effect of Angiotensin II-Induced Increase in Nitric Oxide in the Renal Medullary Circulation, 271
Racial Differences in Nitric Oxide–Mediated Vasodilator Response to Mental Stress in the Forearm Circulation, 1235
Relaxin Activates the L-Arginine–Nitric Oxide Pathway in Vascular Smooth Muscle Cells in Culture, 1240
Renal Changes Induced by Nitric Oxide and Prostaglandin Synthesis Reduction: Effects of Trandolapril and Verapamil, 657
Resistance to Endotoxin Shock in Spontaneously Hypertensive Rats, 1350
Review of Alterations in Endothelial Nitric Oxide Production in Diabetes: Protective Role of Arginine on Endothelial Dysfunction, 1047
Role of Ca^{2+}-Activated K^+ Channels in the Protective Effect of ACE Inhibition Against Ischemic Myocardial Injury, 1290
Role of Endogenous Nitric Oxide in the Brain Stem on the Rapid Adaptation of Baroreflex, 27
Role of Nitric Oxide in Adenosine-Induced Vasodilation in Humans, 1061
Role of Tyrosine Kinase in Dilator Responses of Rat Basilar Artery In Vivo, 861
Systemic Hemodynamics and Regional Blood Flow During Chronic Nitric Oxide Synthesis Inhibition in Pregnant Rats, 315
Upregulation of Renal and Vascular Nitric Oxide Synthase in Young Spontaneously Hypertensive Rats, 1248
Vascular Function in the Vitamin E–Deprived Rat: An Interaction Between Nitric Oxide and Superoxide Anions, 830

Nitric oxide synthase
Alterations of Nitric Oxide Synthase Expression With Aging and Hypertension in Rats, 643
Calcium and Protein Kinase C Mediate High-Glucose-Induced Inhibition of Inducible Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 289
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608
Estrogens Increase Transcription of the Human Endothelial NO Synthase Gene: Analysis of the Transcription Factors Involved, 582
Nitric Oxide in Hypertension: Relationship With Renal Injury and Left Ventricular Hypertrophy, 189
Nitric Oxide Synthase Activity and Renal Injury in Genetic Hypertension, 266
Renoprotective Effects of Felodipine and/or Enalapril in Spontaneously Hypertensive Rats With and Without L-NAME, 795
Upregulation of Renal and Vascular Nitric Oxide Synthase in Young Spontaneously Hypertensive Rats, 1248

Nitroprusside
Role of Nitric Oxide in Adenosine-Induced Vasodilation in Humans, 1061

NK1 receptor
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473

NOC 18
Enhanced Depressor Response to Nitric Oxide in the Rostral Ventrolateral Medulla of Spontaneously Hypertensive Rats, 1030

Norepinephrine
Cytochrome P-450 Metabolites Mediate Norepinephrine-Induced Mitogenic Signaling, 242
Eclamptic Plasma Stimulates Norepinephrine Release in Cultured Sympathetic Nerve, 1343
Insulin-Mediated Venodilation Is Impaired in Patients With High Cholesterol, 1266
Neural and Hypotensive Effects of Angiotensin II Receptor Blockade, 378
Nitric Oxide Opposes Myogenic Pressure Responses Predominantly in Large Arterioles In Vivo, 787

Normotension
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83

Nucleus tractus solitarii
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473

O

Obesity
Dissociation Between Muscle and Skin Sympathetic Nerve Activity in Essential Hypertension, Obesity, and Congestive Heart Failure, 64
Genetic Markers at the Leptin (*OB*) Locus Are Not Significantly Linked to Hypertension in African Americans, 1230
Longitudinal Correlates of Change in Blood Pressure in Adolescent Girls, 97

Oleic acid
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978

Oligonucleotides, antisense
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978

Oxidation
Low-Density Lipoprotein Oxidation and Vitamins E and C in Sustained and White-Coat Hypertension, 621

Oxytocin
Oxytocin Pathways Mediate the Cardiovascular and Behavioral Responses to Substance P in the Rat Brain, 480

P

Pain threshold
Treatment With Enalapril Modifies the Pain Perception Pattern in Hypertensive Patients, 1146

Paracrine
Adrenomedullin: A Possible Autocrine or Paracrine Inhibitor of Hypertrophy of Cardiomyocytes, 505

Peptides
Augmentation of Aortic Ring Contractions by Angiotensin II Antisense Peptide, 854
Suppression of ANP Gene Transcription by Liganded Vitamin D Receptor: Involvement of Specific Receptor Domains, 1338

Perfusion
Perindopril Treatment Affects Both Preglomerular Renal Vascular Lumen Dimensions and In Vivo Responsiveness to Vasoconstrictors in Spontaneously Hypertensive Rats, 1007

Pericytes
Vascular Endothelial Growth Factor mRNA in Pericytes Is Upregulated by Phorbol Myristate Acetate, 511

Peroxynitrite
Vascular Function in the Vitamin E–Deprived Rat: An Interaction Between Nitric Oxide and Superoxide Anions, 830

Pharmacology
Spontaneously Hypertensive Rats: A Potential Model to Identify Drugs for Treatment of Learning Disorders, 968

Phenotype, intermediate
Increased Urinary Free Cortisol: A Potential Intermediate Phenotype of Essential Hypertension, 569

Phenylephrine
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39

Phorbol myristate acetate
Vascular Endothelial Growth Factor mRNA in Pericytes Is Upregulated by Phorbol Myristate Acetate, 511
Phospholipases
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421
Role of Phospholipase A_2 Isozymes in Agonist-Mediated Signaling in Proximal Tubular Epithelium, 809
Phosphotyrosine phosphatase
Different Signaling Pathways Mediate Stimulated Secretions Of Endogenous Ouabain and Aldosterone From Bovine Adrenocortical Cells, 463
Phytoestrogens
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Placebo
Dose-Related Efficacy of Irbesartan for Hypertension: An Integrated Analysis, 1311
Plasma
Acute ACE Inhibition Causes Plasma Extravasation in Mice That is Mediated by Bradykinin and Substance P, 1299
Plasma volume
Evolution of Chronic Nitric Oxide Inhibition Hypertension: Relationship to Renal Function, 21
Platelets
Methacholine-Induced Contraction of Rabbit Pulmonary Artery: Role of Platelet-Endothelial Transcellular Thromboxane Synthesis, 206
Polymorphism
Angiotensin-Converting Enzyme Gene Polymorphism Is Associated With Endothelium-Dependent Vasodilation in Never Treated Hypertensive Patients, 900
Gender-Specific Association of M235T Polymorphism in Angiotensinogen Gene and Diabetic Nephropathy in NIDDM, 896
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925
Postmenopausal women
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Potassium
Effect on Blood Pressure of Potassium, Calcium, and Magnesium in Women With Low Habitual Intake, 131
Potassium channels
Effect of Selective Inhibition of Soluble Guanylyl Cyclase on the K_{Ca} Channel Activity in Coronary Artery Smooth Muscle, 303
Mechanisms Responsible for Forskolin-Induced Relaxation of Rat Tail Artery, 872
Role of Ca^{2+}-Activated K^+ Channels in the Protective Effect of ACE Inhibition Against Ischemic Myocardial Injury, 1290
Pravastatin
Effects of Lipid-Lowering Agents in the Dahl Salt-Sensitive Rat, 225
Preeclampsia
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Pregnancy
Blood Pressure Excess for the Early Identification of Gestational Hypertension and Preeclampsia, 83
Systemic Hemodynamics and Regional Blood Flow During Chronic Nitric Oxide Synthesis Inhibition in Pregnant Rats, 315
Pressure-natriuresis
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Prevalence
Trends in Hypertension Prevalence, Treatment, and Control: In a Well-Defined Older Population, 552
Proliferation
Adenosine Inhibits Growth of Human Aortic Smooth Muscle Cells Via A_{2B} Receptors, 516
Angiotensin II Induces Vascular Smooth Muscle Cell Replication Independent of Blood Pressure, 1331
Cytochrome P-450 Metabolites Mediate Norepinephrine-Induced Mitogenic Signaling, 242
17β-Estradiol, Its Metabolites, and Progesterone Inhibit Cardiac Fibroblast Growth, 522
Prostacyclin synthase
Prostaglandin I_2 Contributes to the Vasodepressor Effect of Baicalein in Hypertensive Rats, 866
Prostacyclins
20-HETE Relaxes Bovine Coronary Arteries Through the Release of Prostacyclin, 237
Role of Ca^{2+}-Activated K^+ Channels in the Protective Effect of ACE Inhibition Against Ischemic Myocardial Injury, 1290
Prostaglandins
Coordinate Expression of Cyclooxygenase-2 and Renin in the Rat Kidney in Renovascular Hypertension, 201
Influence of Venular Prostaglandin Release on Arteriolar Diameter During Functional Hyperemia, 213
Linoleic Acid Induces Relaxation and Hyperpolarization of the Pig Coronary Artery, 615
Prostaglandin I_2 Contributes to the Vasodepressor Effect of Baicalein in Hypertensive Rats, 866
Renal Changes Induced by Nitric Oxide and Prostaglandin Synthesis Reduction: Effects of Trandolapril and Verapamil, 657
Renal Substance P–Containing Neurons and Substance P Receptors Impaired in Hypertension, 815
Protein kinase
Enalapril Induces Regression of Cardiac Hypertrophy and Normalization of pH_i Regulatory Mechanisms, 961
Protein kinase C
Calcium and Protein Kinase C Mediate High-Glucose-Induced Inhibition of Inducible Nitric Oxide Synthase in Vascular Smooth Muscle Cells, 289
Lysophosphatidylcholine Stimulates MAP Kinase Activity in Rat Vascular Smooth Muscle Cells, 248
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978
Renal Substance P–Containing Neurons and Substance P Receptors Impaired in Hypertension, 815
Protein synthesis
Bradykinin Blocks Angiotensin II–Induced Hypertrophy in the Presence of Endothelial Cells, 39

Q

Quantitative trait loci
Effect of Renin Gene Transfer on Blood Pressure in the Spontaneously Hypertensive Rat, 373
Salt Susceptibility Maps to Chromosomes 1 and 17 With Sex Specificity in the Sabra Rat Model of Hypertension, 119

R

Race
Antihypertensive Efficacy of Treatment Regimens Used in Veterans Administration Hypertension Clinics, 771
Ethnic Differences in the Hypertensive Heart and 24-Hour Blood Pressure Profile, 1190
Hypertensive Vascular Disease as a Cause of Death in Blacks Versus Whites: Autopsy Findings in 587 Adults, 1070
Influence of Race and Dietary Salt on the Antihypertensive Efficacy of an Angiotensin-Converting Enzyme Inhibitor or a Calcium Channel Antagonist in Salt-Sensitive Hypertensives, 1088
Longitudinal Correlates of Change in Blood Pressure in Adolescent Girls, 97
Racial Differences in Nitric Oxide–Mediated Vasodilator Response to Mental Stress in the Forearm Circulation, 1235
Radiotelemetry
Role of the Adrenal Medullae in Male and Female DOCA-Salt Hypertensive Rats, 403
Randomized controlled trials
Blood Pressure Outcome of Angioplasty in Atherosclerotic Renal Artery Stenosis: A Randomized Trial, 823
Dose-Related Efficacy of Irbesartan for Hypertension: An Integrated Analysis, 1311
Rats
Effect of Renin Gene Transfer on Blood Pressure in the Spontaneously Hypertensive Rat, 373
Endothelin-1 Regulates Tone of Isolated Small Arteries in the Rat: Effect of Hyperendothelinemia, 1035

Interactive Nitric Oxide–Angiotensin II Influences on Renal Microcirculation in Angiotensin II–Induced Hypertension, 1255
Resistance to Endotoxin Shock in Spontaneously Hypertensive Rats, 1350
Salidiuretic Action by Genistein in the Isolated, Perfused Rat Kidney, 706
Salt Susceptibility Maps to Chromosomes 1 and 17 With Sex Specificity in the Sabra Rat Model of Hypertension, 119

Rats, congenic
Candidate Genes in the Regulation of Na^+ Transport by Inner Medullary Collecting Duct Cells From Dahl Rats, 608

Rats, Dahl
Endothelin-A Receptor Antagonism Attenuates the Hypertension and Renal Injury in Dahl Salt-Sensitive Rats, 397
ET_A Receptor Blockade Prevents Increased Tissue Endothelin-1, Vascular Hypertrophy, and Endothelial Dysfunction in Salt-Sensitive Hypertension, 499
Modulation of Blood Pressure in the Dahl SS/jr Rat by Embryo Transfer, 540
Myocardial Contractile Efficiency and Oxygen Cost of Contractility Are Preserved During Transition From Compensated Hypertrophy to Failure in Rats With Salt-Sensitive Hypertension, 949
Nitric Oxide Synthase Activity and Renal Injury in Genetic Hypertension, 266

Rats, inbred SHR
Abnormal Regulation of Transforming Growth Factor-β Receptors on Vascular Smooth Muscle Cells From Spontaneously Hypertensive Rats by Angiotensin II, 672
Alterations of Nitric Oxide Synthase Expression With Aging and Hypertension in Rats, 643
Angiotensin-(1–7) Contributes to the Antihypertensive Effects of Blockade of the Renin-Angiotensin System, 356
Antihypertensive Treatment and the Responsiveness to Glutamate in Ventrolateral Medulla, 73
Estrogen Preserves Regulation of Shear Stress by Nitric Oxide in Arterioles of Female Hypertensive Rats, 309
Independent Genetic Susceptibility to Cardiac Hypertrophy in Inherited Hypertension, 741
Intravenous Injection With Antisense Oligodeoxynucleotides Against Angiotensinogen Decreases Blood Pressure in Spontaneously Hypertensive Rats, 1166
Nitric Oxide Synthase Activity and Renal Injury in Genetic Hypertension, 266
Perindopril Treatment Affects Both Preglomerular Renal Vascular Lumen Dimensions and In Vivo Responsiveness to Vasoconstrictors in Spontaneously Hypertensive Rats, 1007
Renal Substance P–Containing Neurons and Substance P Receptors Impaired in Hypertension, 815
Renoprotective Effects of Felodipine and/or Enalapril in Spontaneously Hypertensive Rats With and Without L-NAME, 795
Spontaneously Hypertensive Rats: A Potential Model to Identify Drugs for Treatment of Learning Disorders, 968
Streptozotocin-Induced Diabetes Enhances Cardiac Heparin-Releasable Lipoprotein Lipase Activity in Spontaneously Hypertensive Rats, 878
Transforming Growth Factor-β and Receptor Tyrosine Kinase–Activating Growth Factors Negatively Regulate Collagen Genes in Smooth Muscle of Hypertensive Rats, 986

Rats, inbred SHRsp
Nephroprotection of an ET_A-Receptor Blocker (LU 135252) in Salt-Loaded Uninephrectomized Stroke-Prone Spontaneously Hypertensive Rats, 995

Rats, transgenic
Additive Effects of Enalapril and Losartan in (mREN-2)27 Transgenic Rats, 692
NK1 Receptor Antagonist Blocks Angiotensin II Responses in Renin Transgenic Rat Medulla Oblongata, 473
Vascular β-Adrenergic Receptor Adenylyl Cyclase System From Renin-Transgenic Hypertensive Rats, 1157

Reactive oxygen species
Cyclic Strain–Induced Reactive Oxygen Species Involved in ICAM-1 Gene Induction in Endothelial Cells, 125

Receptor protein–tyrosine kinase
Transforming Growth Factor-β and Receptor Tyrosine Kinase–Activating Growth Factors Negatively Regulate Collagen Genes in Smooth Muscle of Hypertensive Rats, 986

Receptor subtypes, angiotensin
AT_1 and AT_2 Receptor Blockade and Epinephrine Release During Insulin-Induced Hypoglycemia, 384
AT_2 Receptor Stimulation Increases Aortic Cyclic GMP in SHRSP by a Kinin-Dependent Mechanism, 349
Effects of Angiotensin II Type 1 Receptor Blockade and Angiotensin-Converting Enzyme Inhibition on Cardiac β-Adrenergic Signal Transduction, 747

Receptors
Abnormal Regulation of Transforming Growth Factor-β Receptors on Vascular Smooth Muscle Cells From Spontaneously Hypertensive Rats by Angiotensin II, 672
Antihypertensive Treatment and the Responsiveness to Glutamate in Ventrolateral Medulla, 73
Increased Cardiac Angiotensin II Receptors in Angiotensinogen-Deficient Mice, 45
N-Domain–Specific Substrate and C-Domain Inhibitors of Angiotensin-Converting Enzyme: Angiotensin-(1–7) and Keto-ACE, 912
Reduction of Cold-Induced Hypertension by Antisense Oligodeoxynucleotides to Angiotensinogen mRNA and AT_1-Receptor mRNA in Brain and Blood, 1317

Receptors, adrenergic
Effects of Angiotensin II Type 1 Receptor Blockade and Angiotensin-Converting Enzyme Inhibition on Cardiac β-Adrenergic Signal Transduction, 747
Mechanism of Epinephrine-Induced Platelet Aggregation, 603
Vascular β-Adrenergic Receptor Adenylyl Cyclase System From Renin-Transgenic Hypertensive Rats, 1157

Receptors, angiotensin
Angiotensin AT_{1B} Receptor Mediates Calcium Signaling in Vascular Smooth Muscle Cells of AT_{1A} Receptor–Deficient Mice, 1171
Chronic AT_1 Receptor Blockade Alters Aortic Nerve Activity in Hypertension, 973
Localization and Production of Angiotensin II in the Isolated Perfused Rat Heart, 1111
Oleic Acid and Angiotensin II Induce a Synergistic Mitogenic Response in Vascular Smooth Muscle Cells, 978
Salt Induces Vascular AT_1 Receptor Overexpression In Vitro and In Vivo, 1272
Vasodepressor Actions of Angiotensin-(1–7) Unmasked During Combined Treatment With Lisinopril and Losartan, 699

Receptors, angiotensin II
Different Signaling Pathways Mediate Stimulated Secretions Of Endogenous Ouabain and Aldosterone From Bovine Adrenocortical Cells, 463
Downregulation of Angiotensin II Type 1 Receptor Gene Transcription by Nitric Oxide, 342

Receptors, bradykinin
Three Candidate Genes and Angiotensin-Converting Enzyme Inhibitor–Related Cough: A Pharmacogenetic Analysis, 925

Receptors, cholinergic
N_N-Nicotinic Blockade as an Acute Human Model of Autonomic Failure, 1178

Receptors, corticosteroid
Increased Glucocorticoid Activity in Men With Cardiovascular Risk Factors, 891

Receptors, endothelin
Endothelin-A Receptor Antagonism Attenuates the Hypertension and Renal Injury in Dahl Salt-Sensitive Rats, 397
ET_A Receptor Blockade Prevents Increased Tissue Endothelin-1, Vascular Hypertrophy, and Endothelial Dysfunction in Salt-Sensitive Hypertension, 499
Nephroprotection of an ET_A-Receptor Blocker (LU 135252) in Salt-Loaded Uninephrectomized Stroke-Prone Spontaneously Hypertensive Rats, 995

Receptors, G-protein-coupled
Growth Factors and Mitogen-Activated Protein Kinases, 152

Receptors, prostanoid
Prostaglandin E_2–Induced Aldosterone Release Is Mediated by an EP_2 Receptor, 575

Receptors, sensory
Renal Substance P–Containing Neurons and Substance P Receptors Impaired in Hypertension, 815
Reflex
Dissociation Between Muscle and Skin Sympathetic Nerve Activity in Essential Hypertension, Obesity, and Congestive Heart Failure, 64
Relaxin
Relaxin Activates the L-Arginine–Nitric Oxide Pathway in Vascular Smooth Muscle Cells in Culture, 1240
Remodeling
Effects of AT_1 and AT_2 Angiotensin Receptor Antagonists in Angiotensin II–Infused Rats, 487
Inhibition of Growth of Human Vascular Smooth Muscle Cells by Overexpression of p21 Gene Through Induction of Apoptosis, 493
Opposite Effects of Remodeling and Hypertrophy on Arterial Compliance in Hypertension, 529
Renal
Calcium Mobilization Contributes to Pressure-Mediated Afferent Arteriolar Vasoconstriction, 421
Renal artery obstruction
Blood Pressure Outcome of Angioplasty in Atherosclerotic Renal Artery Stenosis: A Randomized Trial, 823
Renal blood flow
Response of Proximal Tubules to Angiotensin II Changes During Maturation, 415
Renal circulation
Kallikrein Gene Delivery Attenuates Hypertension and Cardiac Hypertrophy and Enhances Renal Function in Goldblatt Hypertensive Rats, 1104
Renal disease
Identification of Human Plasma Kallikrein Gene Polymorphisms and Evaluation of Their Role in End-Stage Renal Disease, 906
Renal failure
Nephroprotection of an ET_A-Receptor Blocker (LU 135252) in Salt-Loaded Uninephrectomized Stroke-Prone Spontaneously Hypertensive Rats, 995
Renal hemodynamics
Angiotensin II Stimulates Synthesis of Endothelial Nitric Oxide Synthase, 283
Induction of P4504A Activity Improves Pressure-Natriuresis in Dahl S Rats, 232
Protective Effect of Angiotensin II-Induced Increase in Nitric Oxide in the Renal Medullary Circulation, 271
Renal injury
Nitric Oxide in Hypertension: Relationship With Renal Injury and Left Ventricular Hypertrophy, 189
Renal insufficiency
Efficacy and Tolerability of Losartan in Hypertensive Patients With Renal Impairment, 684
Renal medulla
Inducible Nitric Oxide Synthase and Blood Pressure, 15
Protective Effect of Angiotensin II-Induced Increase in Nitric Oxide in the Renal Medullary Circulation, 271
Renal nerves
Renal Nerves Promote Sodium Excretion in Angiotensin-Induced Hypertension, 429
Renal pathological changes
Renoprotective Effects of Felodipine and/or Enalapril in Spontaneously Hypertensive Rats With and Without L-NAME, 795
Renal perfusion
Influence of Nitric Oxide in the Chronic Phase of Two-Kidney, One Clip Renovascular Hypertension, 649
Renal plasma flow
Gender Affects Renal Vasoconstrictor Response to Ang I and Ang II, 90
Renal tubulointerstitial injury
